

A Texas Oil Group Company

COMPANY OVERVIEW

PRODUCTS AND SOLUTIONS FOR OIL & GAS

Texas Oil Group, Ltd. Co. brings the most relevant and proven product lines for the Oil & Gas industry directly to operating locations, no matter how difficult the access.

We focus on the needs specific to each client and allocate the resources and energies necessary to provide a complete product line. We work directly with high quality manufacturers to provide our clientele the best performing products in their class. We only carry proven product lines so you know it will perform in the field.

“Our success depends upon our clients receiving the highest quality products, when they need it. Our job is to ensure that happens.”

- Greg Purvis, Texas Oil Group

PARTNERING

We actively partner with our suppliers to provide innovative and sustainable technical solutions that help increase productivity, reduce costs and minimize risks.

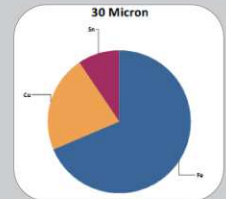

WE PROVIDE HIGH QUALITY PROVEN PRODUCTS & SERVICES FOR REMOTE OIL & GAS OPERATIONS

OILS & LUBRICANTS

TOOL & EQUIPMENT

OIL ANALYSIS & MATERIALS TESTING

A Texas Oil Group Company

PRODUCT OVERVIEW

OILS & LUBRICANTS

- Anti-Seize, Pipe Dope, Tool Joints
- Transmission Fluids
- Food Grade Lubricants
- Hydraulic and Industrial Oils
- Diesel Engine Oil
- Gear Oil

We offer a full line of lubricants and greases made in the USA. We offer hundreds of different types of lubricating oils and greases by utilizing biodegradable, synthetic, and mineral base oils for almost all types of applications including mining, steel mills, marine, construction, oil and natural gas, manufacturing, agriculture, and transportation.

TOOL & EQUIPMENT

- Winches & Hoists
- Industrial Bolting
- Cordless Impact Tools
- Impact Sockets & Accessories
- Air Tool Oils & Greases

We provide diverse and innovative products ranging from complete air compressor systems, tools, ARO pumps, material handling systems and more. We also provide products, services and solutions that enhance our customers' energy efficiency, productivity and operations.

PUMP SYSTEMS

- Vertical
- Specialty
- Submersible Motor
- Single-Stage Process
- Positive Displacement
- Bearings Single Stage
- Bearings Multi-stage

We also offer turnkey pump stations. We can supply you with a complete building package containing pumps, piping, and electrical controls. Our products cover a range that fit most all pump applications in the industry. Whether you need a pump for chemical injection or a high pressure injection we can provide the pump.

OIL FIELD PARTS

- Sheaves
- Drilling Blocks
- Rotary Tables
- Swivels
- Riser Tensioners
- Mud Pumps
- Fairleads
- High Pressure Unions
- Pressure Gauges
- Personnel Transfer Bridges
- Chain Jacks
- Winches
- Traveling Blocks
- AC or DC Drawworks

We are firmly dedicated to providing the highest quality products and services for today's oilfield industry. We are constantly striving to improve designs, streamline manufacturing processes, and reduce costs to better serve our customers. Whether it is a special design or delivery requirement, we strive to satisfy the customer's needs.

TRAINING

- Health & Safety Training
- Materials Testing & Inspection Training
- OVER 150 COURSES AVAILABLE

We combine innovative, hands-on, adult learning techniques with the experience gained from our environmental, health & safety, materials testing, and engineering projects and education.

INFORMATION & SECURITY TECHNOLOGIES

- LIDAR Terrain Analysis
- Business Process Automation
- Local Population Analysis
- Physical & Logical Access Control

We invest in providing key technologies that leverage your current capabilities, are export compliant and ready to act as a force multiplier for your operation.

OIL ANALYSIS & MATERIALS TESTING

An Oil Analysis Survey can help to develop an effective Oil Testing Program. By identifying critical equipment, selecting relevant test packages, and setting program objectives, the program will be productive from the onset. This program outlines the elements of a survey and key benefits that can be realized.

SURVEY & ENGINEERING SUPPORT

We provide our engineering support services to our broad range of clientele from architects to civil engineers to environmental specialists. The high caliber of our staff, top-of-the-line survey equipment, and cutting edge survey software allows us to meet the needs of almost any project.
